# Professional Boundaries with Clients, with Colleagues

Professional Boundaries require us to hold a line in every situation, calling on us to be present & creative in each circumstance. It is paramount for staff working in people-related industries to appreciate and understand the complexities of safe professional boundaries. We'll explore various themes which help to deepen knowledge and skills in working safely, and with care.

## Themes explored during this workshop include:

- Client - staff and collegial relationships
- Dual relationships and other complexities
- Roles we play
- Reasons that transgressions occur.

Using a professional boundary framework the facilitator will explore boundary crossings and violations in the continuum of over- and under- involvement. Psychodrama will be used to deepen participants experiential learning, helping them gain awareness and insight and to also accelerate the rate of integration of the material.
